- SQL expertise and an understanding of the underneath processes of an ORM
- Version control and Git workflow
- Familiarity with Linux/Unix, vagrant

**What we offer:** FTI is proud of its company culture with flat hierarchies and an open door philosophy. A continuous exchange of knowledge within a diverse culture is the key of our growing business. We are more than just a place to work as our employees are very important to us individually. In addition to classical benefits like company pension schemes or extra payments for public transport we want to offer our employees a good work life balance. That is why every FTI employee gets 30 days of vacation as well as attractive employee travel discounts.

Interested? We are looking forward to receiving your online application (including your salary expectations and your earliest starting date).
